### **EXAMINER'S AMENDMENT**

On page 1, paragraph 1, line 2 of the Specification, insert the following after February 8, 2001 --, issued as U.S. Patent No. 6,719,882 --.

#### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:

It does not state that the person making the oath or declaration believes the named inventor or inventors to be the original and first inventor or inventors of the subject matter which is claimed and for which a patent is sought.

#### ***Drawings***

The drawings filed on 2/20/2004 are accepted.

#### ***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance: the nearest prior art, Riebel et al, teaches that use of legume based thermosetting resins, which can be soy protein flour or isolates, in cellulosic fiber composites in an amount less than 40% by weight of the composite results in a significant edge swelling when submerged in water due to insufficient internal bond strength, thus is undesirable (col 31, lines 25-31). The reference also includes a synthetic resin binder in addition to the legume based binder (Abstract; col 12, lines 1-6, 41-47). The nearest prior art thus does not anticipate or suggest using the claimed total amount of resin binders of less than 40%.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
